

Page 11 :

$$AC = 8,4 \cos 35^\circ = 6,88$$

$$KR = PR \sin 48^\circ ; PR = \frac{5,9}{\cos 48^\circ}$$

$$\text{donc } KR = \frac{5,9}{\cos 48^\circ} \sin 48^\circ = 6,55$$

$$EG = \frac{7}{\cos 56^\circ} = 12,52$$

$$JY = 11,3 \sin 76^\circ = 10,86$$

$$AC = 123 \cos 56^\circ = 68,78$$

$$AB = 123 \sin 56^\circ = 101,97$$

$$PO = \frac{58,7}{\sin 62^\circ} = 66,48$$

$$HO = 66,48 \cos 62^\circ = 31,21$$

$$GT = \frac{19}{\cos 23^\circ} = 20,64$$

$$TI = 20,64 \sin 23^\circ = 8,06$$

Page 12 :

$$1) BC = AB \sin 69^\circ ; \quad AB = \frac{120}{\cos 69^\circ}$$

$$\text{donc } BC = \frac{120}{\cos 69^\circ} \sin 69^\circ = 312,61 \text{ m}$$

$$2) BC = \frac{160}{\cos 65^\circ} \sin 65^\circ = 343,12 \text{ m}$$

$$3) BC = \frac{60}{\cos 40^\circ} \sin 40^\circ = 50,35$$

$$4) BC = \frac{80}{\cos 50^\circ} \sin 50^\circ = 95,34$$
