

Pag 15

$$BC \hat{=} \frac{11}{\operatorname{tg} 52^{\circ}} = 8,6$$

$$\hat{PMR} = \arccos\left(\frac{9}{24}\right) = 68^{\circ}$$

$$\cos 36^{\circ} = \frac{16}{JL} \Rightarrow JL = \frac{16}{\cos 36^{\circ}} = 19,8$$

$$SU = 12 \sin 73^{\circ} = 11,5$$

$$\hat{DEF} = \arcsin\left(\frac{12}{25}\right) = 29^{\circ}$$

$$\operatorname{tg} 58^{\circ} = \frac{7,5}{NG}$$

$$\Rightarrow NG = \frac{7,5}{\operatorname{tg} 58^{\circ}} = 4,7$$
