$$E \times 5: \quad f(x) = x + 2 + x e^{-2x} \qquad I = [\sigma; +\infty[$$

$$1. \quad \lim_{x \to +\infty} f(x) = \lim_{x \to +\infty} (x + 2 + \frac{x}{e^{2x}}) = +\infty + 2 + 0 = +\infty$$

2.
$$f-D = xe^{-2x} = \frac{x}{e^{2x}}$$

 $\lim_{x\to +\infty} (f-D) = 0$ D est asymptote
 $\lim_{x\to +\infty} (f-D) = 0$ $\lim_{x\to +\infty} (f-D) = 0$
