PROPRIÉTÉS EXPONENTIELLE

$$f(x) = e^x \rightarrow fonction exponentielle$$

1)
$$f'(x) = e^x$$

3)
$$e^{x+y} = e^x e^y$$

4)
$$e^{-x} = \frac{1}{e^{x}}$$

5)
$$e^{x-y} = \frac{e^x}{e^y}$$

$$6) \left(e^{x}\right)^{n} = e^{nx}$$

$$E_{\times}: e^{x^2} = e^{u} \quad \text{avec} \quad u = x^2 \quad u' = 2x$$

$$\Rightarrow (e^{x^2})' = 2x e^{x^2}$$
